Getting Started

1

FULLY CHARGE YOUR LINKSQUARE DEVICE PRIOR TO USE.

The **Battery Indicator** will stop blinking when charging is complete.

2

DOWNLOAD LINKSQUARE BASIC ON YOUR COMPUTER.

Download the software from the link provided in your order-related emails.

*Windows 7 or higher is required to install.

Getting Started

3

ENTER YOUR UDID AND INSTALL THE SOFTWARE.

Enter the UDID on the Welcome card that is included in your LinkSquare box.

4

TURN ON YOUR LINKSQUARE DEVICE.

The **Indicator** turns blue when LinkSquare is on.

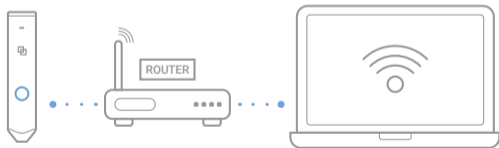

Connecting to Computer

There are two options to connect LinkSquare device and your computer.
Press the **LS Button** to switch between the two Modes.

IoT MODE

CONNECT VIA YOUR INTERNET ROUTER.

Ensure that the **Indicator** is set to **blue** for IoT Mode.

Select "**IoT Mode**" icon on the launch page of the software and follow the directions.

AP MODE

CONNECT VIA LINKSQUARE'S BUILT-IN WI-FI.

Ensure that the **Indicator** is set to **green** for AP Mode.

Search for "LS-XXXXXXX" Wi-Fi network on your computer and enter the following password: **00000000**.

Playing with LinkSquare Basic

1

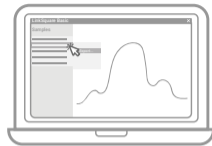

Connect LinkSquare device and LinkSquare Basic software by pressing "Connect" icon in the software. The **Indicator** turns white when LinkSquare is connected to the software.

2

Point LinkSquare device straight down at the object to be scanned and press **LS Button** or click "Scan" icon in the software to scan.

3

You can view the collected data by selecting one from the "Sample" window. Right click on the sample for more options. You can also export the collected data to various output file formats.

4

Click "Disconnect" icon in the software to disconnect LinkSquare from the software.
